

RPC-2200D

Electronic Pump Controllers

Recommended for:

RPCs can be installed on Surface and Submersible, Centrifugal, Peripheral, jet Reciprocating pumps Etc. for residential, domestic, irrigation and booster systems.

Proven Reliability

FEATURES & BENEFITS:

- Water shortage protection.
- Check the usage time.
- Avoids pressure and flow fluctuations.
- Built-in pressure and flow switch.
- Built-in check valve.
- Water tower mode.
- Provides for an adjustable downstream pressure.
- Built-in dry-run protection.
- Assists in absorbing water hammer.
- Can be used with or without pressure tank.
- Simple installation saves space and time.
- Eliminates pump pressure switch.
- Can be installed at any angle.
- All inoxidable components.
- Dual voltage 115 / 230 VAC (According to the order).
- No maintenance required.

Technical Data:

MODEL	NAME	VOLTAGE	POWER	FREQUENCY	Max. CURRENT	STARTING PRESSURE	Max. PRESSURE	Max. Temp.	Protection grade	SUCTION-DISCHARGE
RPC-2200D	PELTA-D	115/220V	2.2KW	50Hz	30A	0 - 9.4bar	15bar	0-100°C	IP65	1" - 1"

Dual control using a flow switch and a pressure sensor, with an application range of 0-10 bar.
